

## YURIY MAKAROVICH BEREZANSKY

Yuriy Makarovich Berezansky, a prominent Ukrainian mathematician, one of the founders of modern functional analysis, the patriarch and founder of the Kyiv school of functional analysis, Editor-in-Chief of MFAT, died on June 7, 2019, in Kyiv at the age of 94.

Yuriy Makarovich was born on May 8, 1925 in a Ukrainian family in Kyiv; all his later life was connected with this city. In 1944 he entered the Faculty of Physics and Mathematics of Kyiv State T. G. Shevchenko University, and after graduation (1948) entered the postgraduate study at the Department of Algebra and Functional Analysis of the Institute of Mathematics. His scientific supervisor was M. G. Krein. Here he held all the scientific positions up to the head of the department first of mathematical (1960-1986) and then functional (1986-2001) analysis, becoming a Corresponding member (1964), and later (1988) an Academician of the National Academy of Sciences of Ukraine.

Yu. M. Berezansky was awarded the State Prize of Ukraine in the field of science and technology (1998), and Krylov (1980) and Bogolyubov (1997) Prizes of NAS of Ukraine.

Yu. M. Berezansky worked in the field of functional analysis, the theory of operators, the theory of differential equations and their applications. He was an author of many well-known monographs, his former students became well-known mathematicians working in many countries. We convey our deepest condolences to relatives and colleagues of Yuriy Makarovich.

This is a heavy loss for our journal and for mathematicians of the world.
